

Novo digy
Numeric combination keypad
Rolling code
433.92 MHz

NOVO digy is the KINGgates numeric combination keypad via radio that can control up to 3 automation with a security code and also has a direct channel without numeric code combination.

NOVO digy is programmed as a simple remote control and provides maximum security through the MASTER code changed or deleted only by the installer. NOVO digy is the perfect combination of aesthetic design and installation flexibility. Designed to be installed vertically with screen printing of the numbers on the front, you can instal NOVO digy horizontally by applying a rigid label (included in the package rotating the numbers of 90°).

Like every product of the NOVO line you can install the device on recess box 503.

*Metal protection
dust painted*
